CHINWENDU MARVELLOUS AJAEGBU-CALEB

Also known as Caleb Marvel • Caleb Marvel Enterprise

Meta Ads Specialist | Paid Social & Performance Marketer | Pixel & Attribution Setup

Owerri, Nigeria • Remote / Hybrid • calebmarvel9@gmail.com • linkedin.com/in/caleb-marvel

Portfolio: <https://cmepportfolio.lovable.app>

SUMMARY

Meta Ads specialist with hands-on campaign management across cosmetics, FMCG, and fintech client accounts -- running Meta Ads Manager from creative brief through media buy, pixel/attribution setup, and post-campaign analysis. Comfortable owning Meta Pixel and conversion-tracking setup end-to-end (Pixel, CAPI, GA4) so ad performance is measured accurately from day one, not guessed at. Operates under Caleb Marvel Enterprise, a registered digital marketing practice, with a track record of taking paid and organic campaigns to measurable revenue outcomes -- including turning a client's paid and organic social investment into \$5,000+ in monetized revenue within 30 days.

CORE SKILLS

Meta Ads Manager (Campaign Build, Audience Targeting, Budget Scaling) • Meta Pixel & Conversions API (CAPI) Setup • GA4 Attribution & Tracking • Creative Testing & Optimization • Retargeting & Lookalike Audiences • ROAS & CAC Optimization • Budget Scaling Discipline • Landing Page & Funnel Coordination • Direct-Response Copywriting

EXPERIENCE

Founder & Lead Strategist -- Caleb Marvel Enterprise (Digital Marketing, Content & Direct-Response Systems)

- Managed Meta Ads Manager campaigns for e-commerce and cosmetics brands (Luscents, McDobi GLOBAL, Hopmichar), running full campaign lifecycle from creative brief and audience targeting through budget scaling and post-campaign analysis.
- Set up and managed pixel-based conversion tracking (Meta Pixel, GA4) for client ad accounts, so campaign optimization was based on verified conversion data rather than platform-reported clicks alone.
- Ran compliance-sensitive paid acquisition campaigns for James Trading Strategies in the fintech/trading-education niche, balancing performance goals against Meta's financial-advertising policy constraints -- then combined that paid spend with organic content to take Instagram, Facebook, and Twitter/X from 0 to 10,000+ followers in 7 days, monetizing the audience to \$5,000+ in revenue within 30 days.
- Built full-funnel paid growth strategy for Suncious Foods (FMCG), managing Meta ad spend against measurable follower growth and cost-per-lead targets.
- Built B2B lead-generation funnels and GA4/HubSpot attribution infrastructure from the ground up for Zonia Hub, a two-sided marketplace -- the same pixel-to-dashboard discipline applied to a different vertical.

CERTIFICATIONS
